

Team Selection Policy

OUR COMMITMENT

Our club offers all members the opportunity to participate in either recreational or competitive calisthenics. Being part of the competition team is open to every member.

WHAT WE WILL DO

- The club will request that members or their guardians state their preference for either competing or non-competing (recreational) membership on their enrolment form.
- If members are committing to be being part of the competing team, then the members are expected to attend all training sessions and attend all competitions. Members cannot be selective regarding the competitions they attend. If a member is unable to attend a scheduled training session, the coach must be informed.
- Additional classes will be organised throughout the season, it is expected that the members of the competing team attend all scheduled training sessions. This will ensure the best possible performances are presented at all competitions.
- The coaches will be committed to coaching all the team members, aiming to showcase all of the member's skills and talents.
- The coaches will position the members in a team item according to requirements of the music and item, and whether they are a competing or non-competing member. Non-competing members will be positioned in a team to ensure it does not affect the competing team's positions.
- The coaches' aims are for all members to enjoy the sport of calisthenics and to flourish under their guidance and coaching.

WHAT MEMBERS AND GUARDIANS WILL DO

- The club asks that all members and guardians respect the decisions of the coaches, regarding the calisthenics items and team positions.
- If guardians or members have any concerns regarding such decisions, they are to speak respectfully to the coaches in private regarding the issue.
